

System Profiler for BusinessObjects Packaged Reports

System Profiler for BusinessObjects is packaged with a total of 20+ pre-built reports that can be imported into your BusinessObjects environment. These reports allow for quick environment analysis, and can also serve as a starting point for modifications and custom development.

System Profiler captures BusinessObjects system information in these areas:

- License Consumption
- Universe detail and contents
- Objects used within Web Intelligence reports
- Report to Universe / Business View lineage
- Server configuration settings
- Universe to connection lineage
- Scheduled instance statistics and failures
- User / Group membership analysis
- System-wide object ownership information
- System "housekeeping" analysis (old / inactive / excess / orphaned) objects.
- Object detail (repository table) information

Descriptions and examples of all of the available reports are available below.

26. Package Membership

Format: Webl

This report displays all packages and their contents by object type.

Package Membership			
Average Number of Users Logged In			
Crystal Name	Webl Name	Deskl Name	Static Name
1. Average Number of Sessions			
2. Users Logged In			
3. Average Number of Users Logged In			
Average Refresh Time			
Crystal Name	Webl Name	Deskl Name	Static Name
1. Average Refresh Time by Document			
2. Average Refresh Time by User			
3. Average Refresh Time by Server			
Average Session Duration			
Crystal Name	Webl Name	Deskl Name	Static Name
1. Average Session Duration - Year			
2. Average Session Duration - Quarter
